

- < On call every Fri. Health officials anticipate being out of stage 5 mid Feb.
- < Typically test 550-570 people.
- < Alleviating “ health rooms”
- < Make sure with positives calling PCP.
- < Feb 4, 11 dates for mass testing.
- < Last Friday testing during asynchronous days
- < AISD not a vaccine distributor. Partnered with Community Care, Austin Public Health. Working off of list from Health and Human resources.
- < Q: Do we know if 900 people who got vaccines got 2nd vaccine?
- < A: some have reached out to say yes. The agency giving them
- < Q: what percentage positive during mass vacc?
- < A: 3.93% with rapid tests. 2 months 6700 rapid tests
- < Q: can we reach out to medically fragile population of students, homebound students, and 18+ students?
- < A: will reach out to see if that can be a priority.
- < Q: Who should we recommend teachers and school staff contact that are being told that they fulfill 1 b criteria?
- < A: Use Let’s Talk or Hannah Gehl.
- < Q: National news and AISD and Public Health is outpacing the positivity rate for Austin Travis County. What can you tell us about this? Cites report from media
- < A: The positives we get reported are put on dashboard. Clarity about which positives we report. Ex: remote learner that has never been in school is not reported. Concerned about transmission in campus. If Austin Public Health gets a report

about a student/staff, they must contract trace for that but may not connect those cases to AISD if they haven't been on campus.

Only students reporting on campus are reported.

Q: are sports included?

A: Yes, if the student comes onto campus

being told what to do and loss of liberty. That is what is happening.

Co-chair asks if we should modify resolution to read sports should be suspended unless all can be masked.

Coaches, officials, spectators and volunteers should wear cloth face coverings at all times.

Discussion that masks don't impact performance.

Q: are athletes not wearing masks?

A: Yes, basketball players not expected to wear masks.

Exceptions to masks: cheerleading, wrestling, swimming.

Q: Do we know positivity rates among athletes?

A: no.

Q: is testing mandatory?

A: no. it can be offered but not mandated.

UIL updates placed in chat. <https://www.uiltexas.org/policy/covid-19>

All the doctors weigh in.

UIL says face coverings don't have to be worn at all time.

SHAC doesn't want to recommend suspension.

Preference to say required with no consequences.

Michelle: UIL governs athletics.

Michelle Mejia: More of a symbolic statement. How can we push the conversation more around outdoor spaces and other health inequities? See how we can push other things? We might be able to get more traction.

Me: Only passing kids get to play. Only certain kids are passing and the no pass no play rule means. We are perpetuating inequity when only certain kids get to play. Can we recommend alternative means of allowing play?

The policy is shared about mask wearing.

We can recommend testing along with mask wearing?

Hannah reminds us of our charge.

Co-chair explains charge and limits of recommendations and we have no power. We can recommend anything but won't be legally binding.

SHAC utilize Let's Talk to report mask wearing violations.

Let's Talk is collaborative across depts.

Co-chair states impressed with testing 550 people with the staff we have and Hannah being at so many places.

Co-chair has typed thoughts from committee.

Co-chair types up new recommendation.

Me: Wanted explanation of where UIL starts and district ends. I would have appreciated this system.

Director of Athletics was emailed by Hannah. Someone on Director's team saying " No thank you, not at this time". A week notice was provided.

Michelle Rusnak posts UIL/TEA document.

Recommendation is finessed by co-chair

Motion made by Stephanie Carter Seconded Swati Avashia to pass this resolution.

Co chair asks for change forestablished member. Swati brings it Susanne Kerns seconds
